### DETAILED ACTION

1. This office action is in response to Applicant's amendment filed on 22 May 2007.

#### ***Allowable Subject Matter***

2. Claims 1, 3-8, 10-12, and 15 are allowed. Claim 1 is the independent claim.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is German Patent DE 101 23 717.0 to Muller, which was applied to the claims in the office action mailed 22 February 2007. Suffice it to say, the patent to Muller at least does not disclose "a drive unit having a drive shaft and a rotor which is mounted in fixed rotative engagement to the drive shaft" or "wherein the spindle head assembly and the drive unit are positioned in axially successive relationship and detachably connected to one another to allow an exchange of the tool, while the drive unit rotates" as claimed in independent claim 1, and as such does not anticipate the instant invention as disclosed in independent claim 1.

Furthermore, there is no combinable teaching in the prior art of record that would reasonably motivate one having ordinary skill in the art to so modify the teachings of Muller, and thus, for at least the foregoing reasoning, the prior art of record does not render obvious the present invention as set forth in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
